

Prairie State College Mobile Training Centers

ADA and climate-controlled environments, equipped with welding stations, CNC stations, a robotic arm, industrial electric equipment, simulation technology, 3D printer, laptops, internet, and video streaming

The Mobile Training Centers offer:

- On-site, hands-on training using current technology
- Customizable curriculum, including classroom instruction and practical application
- Training that can be applied toward a college degree or as professional development
- Lab exercises designed to enhance employee competence and performance

Employers will:

- Minimize loss of production time and travel expenses
- Increase engagement, efficiency, and retention
- Maintain a competitive edge
- Increase safety performance by uniform adherence to industry standards
- Reduce the manufacturing skills gap
